Nematodes As Biological Control Agents (Cabi)

Synopsis

This book documents and illustrates major developments in the use of nematodes for the biological control of insects and slugs. It covers the use of three main types of nematodes: entomopathogenic nematodes, entomophilic nematodes and slug-parasitic nematodes. The biology, commercial production, formulation and quality control, application technology, strategy and safety of each of these three nematode groups is discussed. The book also examines the application of nematodes in different cropping systems, and the efficacy of nematodes against specific pests. The potential of predatory nematodes to control plant-parasitic nematodes and mycophagous nematodes to control fungal pathogens is also reviewed.

Book Information

Series: Cabi

Paperback: 528 pages

Publisher: CABI; First edition (March 28, 2008)

Language: English

ISBN-10: 1845934547

ISBN-13: 978-1845934545

Product Dimensions: 9.5 x 0.9 x 6.8 inches

Shipping Weight: 2.5 pounds (View shipping rates and policies)
