## Customer Reviews

The book was in fine condition but I rented it expecting to get the book plus an access card. Don't rent this book if you hope to get the access card! I contacted and was told that the access card only comes with the book when you buy it new. I didn't read that anywhere on the page though. Pretty disappointed because now I have to go buy the code separately. Not worth it.

The information in this book is great, however, there was no access code for me to use. I rented this book, and if it was not available on the rental, then it should say so in the description. Now, I have to go and buy one for another \$38.50.

i am very bothered by the fact that before ordering this i was not told that the access code was modified, and the modified version is not the one i need and there is no telling how i would have known this was modified prior to having placed my order

Access code needed for the course was not included despite that the heading said, "Plus MasteringGeology with eText--Access Card Package included". The description is too vague when it comes to what is included with rentals.

book is what i need but the access code did not work for my class so i had to spend another 70\$ for that from the pearson website. not happy about that.

I know the description said it may not contain access code but was hoping it would. I may have to return the book if it has no value without the code.

It was great! The material covered everything I needed. Everything was very easy to navigate for my class. Than you!

Maybe I missed it. But it would be great if it's states that the mastering geology access card comes with the book if purchasing new.
