Spectroscopic Techniques In Biophysics (Veneto Institute Of Sciences, Letters And Arts Series, 4)

Synopsis

This volume brings together the lectures given during the 1999 session of the School of Pure and Applied Biophysics. It concerns a number of spectroscopic tools, both experimental and computational, frequently encountered in biophysical research. The chapters of the book have been compiled from the lecture notes distributed among the participants at the school. The authors are specialists in their respective fields.
