I am a pediatric speech-language pathologist with 21 years experience working with kids, teens & young adults ages birth to 21 years of age in a variety of settings (homes, childcare centers, schools, Headstarts, churches & a pediatric hospital). I am also the founder of OMazing Kids Yoga. Children & teens of all ages & backgrounds face ever increasing pressure & stress. This is especially true for many kids and teens with special needs. I recently had the opportunity to review several of the wonderful Stress Free Kids products that were donated for me to give away as door prizes at a presentation I will be doing at the 3rd annual Oklahoma Autism Conference. I highly recommend the Indigo Teen Dreams CD! The content & narration style are very age appropriate for the target audience & will give teens easy strategies they can use anywhere/anytime they are feeling stressed or overwhelmed. Affirmations: In my experience teaching self-esteem to teenage girls I have found awareness of major critical thought patterns beneficial. Then create positive affirmations related to a specific critical thought pattern. For example, I will never be good enough would have a positive affirmation of, I am good enough. Again the teen would practice awareness by recognizing the critical thought and then saying, I am good enough. Since critical thoughts have been repeated for years it takes time to reprogram them. **Breathing:** The abdominal breathing exercise serves as a good introduction to deeper breathing for stress and emotional release. For hyperventilation I have found asking the teen to breathe into their abdomen with a 4 to 8 or 6 to 12 count to be effective to calm the anxiety. For example, breathe in 4 and then breathe out for 8 slowly. **Muscular Relaxation:** The music is relaxing. Relaxing from the feet up is fine. I, however, would start from the head down as more stress is held in the head, neck, and chest areas. **Visualization:** Of all the exercises I liked the rainbow visualization the best. Going through all the chakras from the lower body upward visualizing

the specific chakra color I found simple and effective. Great for children and teens. Very few relaxation CD's for young people available. Buy these CD's today.

As a life coach for parents of teens, I am always open to reviewing potential products that can help parents positively impact their teenagers' growing up experience. Teens today are stressed more than ever before, and parents often scramble for ways to help that are significantly effective. When Lori Lite first asked me to write a review for the Indigo Teen Dreams 2 CD set, I wasn't sure what to expect. Teenagers aren't known for their positive response to gimmicky tactics designed to make their parents feel better. But when I listened to the CDs I immediately knew that this was something different. More importantly, the teens that I asked to listen with me were also enthusiastic in their positive response. If your teenager struggles to cope with the day-to-day stress of navigating adolescence (and that really is every teen), you owe it to them to give them this powerful CD set. Teenagers rarely process emotional challenges by sitting down and having long conversations, leaving them with worries and fears that bounce around inside when they lay down to sleep. This CD set will help to transform their ability not only to relax, but will also help them begin to have self-belief and confidence. I would encourage any parent of teens to take advantage of this amazing resource. ~RJ, the HOPE Coach ronaejull.com

I am a student pursuing my nursing degree and working as a massage therapist. I was given this CD set from one of my clients when I mentioned how stressful my schedule was and how I couldn't sleep well at night. I was amazed at how the techniques helped me to relax my mind and body. I no longer lose precious sleep worrying about the next day. The speakers voice is soothing and helps me to fall asleep while I get the added benefit of learning actual stress reducing techniques. I enjoy how the set has 2 CDs. One offers 4 techniques and the other is all music. Some nights I use the techniques and some nights I use the music. I also use the music to relax my clients during massages and they always ask me what the name of the CD is. If you are a teen, college student or young adult... I highly recommend this!!

Teens are under tremendous stress and they need emotional tools to help them navigate Middle School and High School. This 2 CD set gave my teens actual techniques presented on their level. My teens have learned to implement breathing and positive statements to help them relax and feel good about themselves. The 2 CDs give them a choice to just chill to the music or practice the techniques. I recommend this for all teens and even college students. An investment in your teens

future and current wellbeing.
