Battletech Technical Readout 3067

Synopsis

In the savage FedCom Civil War that rocked the Lyran Alliance and the Federated Commonwealth for the past five years, new machines of war have been rapidly tested and put in the field to help turn the tide of battle in each faction's favor. The Clans and other Houses have also been busy, as the internal and external conflicts drive the rapid deployment of the new military hardware.

BattleTech Technical Readout: 3067 provides descriptions, game statistics and illustrations for new BattleMech and vehicle designs. It finally unveils the next generation of Inner Sphere aerospace fighters and OnmiFighters, as well as the Clan's second-line fighters. A handful of new DropShips are also permiered. This technical readout includes those designs previously published in the Field Manual series.

Customer Reviews

One of the few reprint TROs that doesn't remove 'Mechs from the lineup. Bought the TRO 3039 because it combined several older TROs together, and was disapointed to find it was missing stats for favorites such as the Archer. TRO 3067 Reprint contains all the same material as the original release, but with the much nicer Catalyst cover. Notable 'Mechs include ones from the popular Mechwarrior 4, such as the Argus, Thanatos, Hellspawn, Osiris. Also included is the readout for the Perseus. For those who've played Mechwarrior 3, the Perseus is about as close as you will get to the MW3 version of the Orion, and can also be obtained as a miniature. Well laid out, thoughtful text, and excellent line art make the TRO: 3067 a staple for any 'Mech Head's shelf.

I've really enjoyed reading the Technical Readouts since I was a kid. Topps has made sure that the newer TOs live up to the quality of the ones in the past.

Anyone that is into Battletech should be able to appreciate this book. Might not have everything that everyone wants but it's still a nice addition.
